

**FLOOR AMENDMENT**  
HOUSE OF REPRESENTATIVES  
State of Oklahoma

SPEAKER:

CHAIR:

I move to amend HB3411 \_\_\_\_\_  
Of the printed Bill  
Page \_\_\_\_\_ Section \_\_\_\_\_ Lines \_\_\_\_\_  
Of the Engrossed Bill

By deleting the content of the entire measure, and by inserting in lieu thereof the following language:

**AMEND TITLE TO CONFORM TO AMENDMENTS**

Adopted: \_\_\_\_\_ Amendment submitted by: John George \_\_\_\_\_

\_\_\_\_\_  
Reading Clerk

STATE OF OKLAHOMA

2nd Session of the 60th Legislature (2026)

FLOOR SUBSTITUTE  
FOR

HOUSE BILL NO. 3411

By: George

FLOOR SUBSTITUTE

An Act relating to environment and natural resources;  
defining terms; directing the Department of  
Environmental Quality to purchase certain equipment;  
requiring testing of samples of biosolids; requiring  
certain written warning; prohibiting application of  
biosolids to certain crops; prohibiting application  
of biosolids to land more than once every other year;  
directing the Department of Environmental Quality to  
propose rules; requiring implementation on or before  
a certain date; providing for codification; and  
providing an effective date.

BE IT ENACTED BY THE PEOPLE OF THE STATE OF OKLAHOMA:

SECTION 1. NEW LAW A new section of law to be codified  
in the Oklahoma Statutes as Section 2-6-501.7 of Title 27A, unless  
there is created a duplication in numbering, reads as follows:

A. For the purposes of this section:

1. "Biosolids" means primarily organically treated wastewater  
materials from municipal wastewater treatment plants that are  
suitable for recycling as amendments. This term is within the  
meaning of "sludge" referenced in Section 2-6-101 of this title.

1 Nothing in this section shall be construed to apply to septage or  
2 sewage that is removed from residential septic tanks; and

3 2. "PFAS" means per- and polyfluoroalkyl substances, including  
4 but not limited to PFOA, PFOS, and any additional compounds  
5 designated by the Department of Environmental Quality.

6 B. The Department of Environmental Quality shall purchase the  
7 necessary equipment to test for PFAS in biosolids.

8 C. To protect the health and safety of the people of this  
9 state, prior to land application of biosolids, a sample of the  
10 biosolids that are to be applied must first be tested by the  
11 Department of Environmental Quality or by a laboratory appropriately  
12 accredited to perform such an analysis in order to determine the  
13 amount of PFAS in the biosolids prior to land application.

14 D. All farmers and ranchers whose lands are being applied with  
15 biosolids shall be given test results that include nitrogen,  
16 phosphorus, potassium, pH, PFAS, and heavy metal concentrations by  
17 the person or entity providing such biosolids. The Department of  
18 Environmental Quality shall help identify known potential risks, if  
19 any, that must be disclosed. If risks are identified, those risks  
20 shall be provided with the test results from the person or entity  
21 providing biosolids.

22 E. Biosolids may not be applied to land where crops are grown  
23 for human consumption. Furthermore, biosolids may not be applied in  
24 the same place more than once every other year.

1 F. The Department of Environmental Quality shall propose rules  
2 necessary to implement this section, which shall include an approval  
3 process for alternative treatment methods such as microbial and  
4 supercritical water oxidation methods to reduce or remove PFAS from  
5 biosolids.

6 G. The Department of Environmental Quality shall implement the  
7 requirements of this section no later than January 1, 2028.

8 SECTION 2. This act shall become effective November 1, 2026.
